PROFESSIONAL SUMMARY

MCA graduate and aspiring Software Developer with hands-on experience building full-stack applications using Python, FastAPI, React.js and Flask. Developed CareerPilot AI, an AI-powered resume and career assistant with resume parsing, ATS analysis, job matching and skill-gap analysis, along with computer-vision and recommendation-system projects. Skilled in REST API design, MySQL/SQLite databases and OOP, with strong analytical thinking and problem-solving. Seeking an entry-level Software Developer role to build reliable, user-focused software within a collaborative engineering team.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript
Frameworks & Web: FastAPI, Flask, React.js, Vite, HTML/CSS, REST API design, Axios
Databases: MySQL, SQLite
Tools: Git/GitHub, Scikit-learn, MS Excel
Core Concepts: Software Engineering principles, OOP, API integration, Resume/Text Processing, Computer Vision basics, Recommendation Systems

PROJECTS

CareerPilot AI – AI-Powered Resume & Career Assistant

Python, FastAPI, React.js, Vite, Axios, REST APIs

- Developed a full-stack career-assistance platform with a FastAPI backend and a React (Vite) frontend connected through Axios.
- Implemented PDF/DOCX resume parsing, skill extraction, resume quality scoring and ATS compatibility analysis.
- Built job-description matching and skill-gap analysis modules, with resume improvement suggestions.
- Designed REST APIs for learning recommendations and interview preparation, integrated into an interactive interface.

AI Gym Trainer

Python, OpenCV, MediaPipe (Computer Vision)

- Built an AI-based workout monitoring system using real-time pose detection to track exercises and count repetitions automatically.
- Designed analytics and performance-tracking features that give users feedback on workout form and progress.

Movie Recommendation System

Python, Flask, HTML, CSS, SQLite, Scikit-learn

- Built a full-stack movie recommendation web app with secure user login and registration.
- Implemented a content-based recommendation engine using CountVectorizer and Cosine Similarity, with search, genre-based recommendations and YouTube trailer integration.

Weather Forecasting Application

Python, REST APIs, Web Development

- Developed a web application that fetches real-time temperature, humidity, wind speed and conditions via public weather APIs, with dynamic UI updates and reusable code structure.

EDUCATION

Master of Computer Applications (MCA) — 2024 – 2026 • CGPA: 7.3
University of Mysore, SBRR Mahajana First Grade College (PG Wing)

Bachelor of Computer Applications (BCA) — 2021 – 2024 • CGPA: 8.3
University of Mysore, BGS First Grade College

Pre-University (PCMCs) — 2020 – 2021 • 74.16%
PRM Composite PU College, T. Narasipura

CERTIFICATIONS

The Java Language • Software Engineering • The Python Language

LANGUAGES KNOWN

Kannada — Native • English — Professional Working Proficiency
